

DRILLING IN THE ALASKAN WILDERNESS ESSAY

Our deprivation for this atrocious corruption has led us to look for oil deposits in the Alaskan Wilderness. The US needs oil and by drilling for oil.

However, Alaska is wealthy in more than just oil. America can be viewed in a parallel way on its dependency for oil. Our planning for should not be centered around oil, but rather on new energy technologies. In accordance to the affect being very minimal, drilling oil in ANWR will create many new jobs. Many people believe that if oil drilling was to start in the ANWR all of the region would become interrupted. But what is misunderstood is that the development of these cars will take many more years. But those who live in Alaska have a firsthand experience with the land and the wildlife of the refuge. The debate over drilling in environmentally important areas is a heated one. There is an immense debate between the opposing environmentalists and the politicians who want to drill for oil on a section of ANWR, which is only 1. Drilling will also increase oil revenues for the state of Alaska , which is a huge benefit. Many different animals exist in the ANWR such as caribou, polar bears, grizzly bears, wolves and migratory birds Sierra Club. Should the Arctic National Wildlife Refuge be opened to oil drilling. ANWR has been in existence since and has slowly become one of the most controversial topics to hit Congress. Clinton was the last President to do so. Those opposed to oil drilling in ANWR also say that with the new fuel efficient cars being made, we don't need to drill in this region. The only way to achieve these goals is to reduce our dependence on oil " foreign or domestic " through fuel economy, and a cap on carbon emissions. The answer is that only a very small fraction of ANWR will be touched. One such item that is currently being debated is over the idea of drilling for oil in the Arctic National Wildlife Refuge. In conclusion, I hold a firm grasp on the belief that we should not drill for oil in the Alaskan Wilderness. Drilling for Oil in Alaska Essay - Drilling for oil in Alaska may affect the wildlife, but it is a good thing to do because our government well make money and get out of depth. If we need the oil now, we should look inside our own borders first to get it. ANWR oil would be too little too late. The nearby Prudhoe Bay oil fields were originally supposed to comprise acres, but today they spread over , acres. As oil is used in many other things than cars, it is a good idea to drill for oil in ANWR for many more reasons. My opinion and answer to this question would simply be no. This paper will debate whether or not we should allow Arctic National Wildlife Refuge to be opened to oil drilling. What I began to wonder after reading the article is, if we humans should continue our scientific and technological petroleum endeavors even though we are causing irreversible harm to our earth. This will also show the impact it has on the environment, and I will show a critical analysis of the current issue of whether or not to drill. The controversy surrounding ANWR is whether to drill or not to drill into the area. This issue has been fought before the Senate at least three times since If we have it than we should use it, especially since it is needed more than ever before. The US needs oil and by drilling for oil on our own land, we would help our economy, but in doing so would destroy the beauty of the wilderness and harm many others.
